Mohammad Majid

ABOUT ME

I am a passionate and results-driven Full Stack Developer with a deep expertise in **PHP**, **Laravel**, and **Vue.js**. With over 7 years of experience in web development,In the realm of backend development, I have leveraged the power of **PHP** and **Laravel** to build robust **APIs**, streamline database management, and ensure the security and scalability of web applications. I am well-versed in **RESTful** API design, database optimization, and performance tuning.

On the frontend, I am proficient in **Vue.js and ReactJS**, which I use to craft interactive and responsive user interfaces. I have experience with state management using **Redux**, and I am skilled in integrating third-party libraries and APIs to enhance the user experience.

Also Experienced in creating and managing databases using **MYSQL,PostgreSQL and MongoDB**, ensuring data integrity and efficiency.Knowledge of version control systems like **Git** for collaboration and code management.

EXPERIENCE

Futurealiti - Habib Oil Mill, Karachi — *Sr.Programmer*

2021 – OCT 2023

- Developed and maintained full-stack web applications using **Laravel,Vue.js** and **ReactJS**
- Designed and implemented **RESTful APIs** to facilitate efficient communication between the systems.
- Utilized **Components, Middlewares, Global Middlewares, Routing, Group Routing, Helpers, Eager Loading etc** for improving application performance and maintainability.
- Implemented Object-Relational Mapping **(ORM)** for efficient database management and interaction in web applications.
- Implemented user authentication and authorization using **JWT** for secure user access.

- Creating and managing databases using **MYSQL,PostgreSQL** ensures data integrity and efficiency.

ETeam, Karachi — *Sr. Web Developer*

2017 - 2021

- Provided timely technical support and effectively resolved complex technical issues to maintain system uptime.
- Developed and maintained web applications using **Laravel**, ensuring scalability and code maintainability.
- Creating and managing databases using **MYSQL** ensures data integrity and efficiency.
- Integrated third-party libraries and **APIs** to extend application functionality and enhance user experience.

7cTech, Karachi — *Sr. Web Developer*

2015 - 2017

- Develop web applications using the **Laravel framework**, following best practices and coding standards.
- Implement server-side logic, business rules, and data manipulation using **PHP** and **Laravel**.
- Design and optimize database schemas using Laravel's Eloquent **ORM**.
- Implement middleware for tasks like authentication, logging, and request validation.
- Integrate third-party services, APIs, and libraries into the Laravel application as needed (e.g., payment gateways, social media APIs).
- Use version control systems like **Git** to manage and collaborate on code with other developers.

Innovative Solution, Karachi — *Web Developer*

2012 - 2015

- Started career as Junior Java Developer
- Design and implement new features, modules, and functionalities based on project requirements.
- Implement user authentication and authorization mechanisms, including role-based access control, using **Java Platform**
- Collaborate with frontend developers to integrate the backend logic with frontend components.
- Gain proficiency in working with databases, including creating tables, writing **SQL** queries, and using Laravel's Eloquent **ORM** for database interactions.

EDUCATION

Virtual University , Karachi — *(MIT) Master of Information Technology - (In Progress)*

Shah Abdul Latif University , Khairpur — *Bachelor of Computer Science*

SKILLS

- HTML/CSS
    - Forms
    - Responsive Design
    - Cross-Browser Compatibility
- Javascript
    - ES6+
    - Asynchronous Programming
    - Dom Manipulation
    - Event Handling
    - Modularity
    - Closures
    - Error Handling
- jQuery
- AJAX
- PHP
    - MVC Architecture
    - Authentication And Authorization
    - Database Integration
    - Rest API Development
    - Session Management
    - Command-Line Interface (CLI)
- Laravel Framework
    - Eloquent ORM
    - Artisan CLI
    - Helpers
    - Blade Templating
    - Components
    - Middleware
    - Global Middleware
    - Routing
    - Group Routing
    - Form Handling/Validation
    - Database Migrations And Seeding
    - Restful Routing And API Development
- Vue.js
    - Component-Based Architecture
    - Virtual DOM
    - Reactive Data Binding

- Directives
- Computed Properties and Watchers
- Hooks
- Event Handling
- Error Handling
- Vue Router
- Vuex
- Component Libraries And UI Frameworks (Tailwind CSS)

- **React.js**
  - Component-Based Architecture
  - Virtual DOM
  - JSX (Javascript XML)
  - State Management
  - React Router
  - Hooks
  - Error Handling
  - Component Libraries And UI Frameworks (Tailwind CSS)

- **Node.js**
  - Familiar Non-Blocking, Asynchronous I/O
  - NPM (Package Management)
  - Modularity
  - Event-Driven Architecture
  - Server-Side Rendering
  - Restful API Development
  - MVC Architecture
  - Mongodb Integration
  - Mysql Database Integration
  - JWT(Json Web Token)

- **Git**
  - Branching and Merging
  - Collaboration
  - Conflict Resolution
  - Gitignore
  - Tagging
  - Code Review
